

[SPEAKER MODULE FRAME, SPEAKER MODULE THEREWITH, AND ELECTRONIC DEVICE WITH SPEAKER MODULE]

Abstract

An electronic device is provided. The electronic device at least comprises a speaker module. The speaker module includes: a speaker module frame having an accommodating hole; a micro-speaker accommodated in the accommodating hole; a front cover disposed at a first side of the speaker module frame, a front sound enclosure being formed between the front cover and the speaker module frame, the front cover having a plurality of tone holes; a rear cover disposed at a second side of the speaker module frame, the second side being opposite to the first side, a rear sound enclosure being formed between the rear cover and the speaker module frame.
